PROFESSIONAL PROFILE

Alex Morgan — fictional test applicant

Perth WA · alex@example.com

Target role: HD diesel fitter

Professional summary

Trade qualified diesel fitter with a completed apprenticeship and workshop maintenance experience. Carries out fault finding, repairs and planned servicing on Caterpillar and Komatsu equipment. Works on hydraulic systems, engines and transmissions, following isolation and permit to work procedures. Records completed tasks in SAP work orders and communicates remaining faults at shift handover.

Employment history

Diesel fitter, Example Engineering, March 2022 to present.

Inspect equipment, identify defects and explain repair requirements to the supervisor. Use maintenance instructions to plan servicing, replace worn components and check the completed work. Follow workshop safety procedures and report hazards. Discuss task changes with the crew before restarting work. Keep tools and work areas organised and record parts used against each job.

Education and qualifications

Certificate III in Engineering Mechanical Trade, Example Institute, 2021. Completed apprenticeship.

Availability

Based in Perth. Available after two weeks notice and willing to discuss FIFO rosters.
